

tracking ūr wellness

We know life gets busy and despite good intentions, it's not always easy to make healthy lifestyle choices. That's where the tūw™ Smartwatch comes in. Consider it your personal wellness assistant, putting you in touch with your body and motivating you to reach your physical goals.

Step into the world of tūw and watch ūrself go.

tūw smartwatch features

Fitness Dashboard

Get a snapshot of your daily progress as you strive to meet your fitness goals including daily steps, calories burned, distance walked/ran and more.

Stopwatch

Use the built-in stopwatch feature to time your fitness activities – start, pause and stop/reset easily with one touch.

Heart Rate Monitor

Stay in your fat-burning zone and easily view your heart's beats per minute in real-time through the intuitive heart rate monitor interface.

Sport Mode

Activate Sport Mode when you start your workout to track your activity time, calories burned, real-time heart rate and steps taken.

ADDITIONAL FEATURES WITH THE APP

- ✓ Disconnect Alert
- ✓ Fitness Goal Settings
- ✓ Wear Detection
- ✓ Take Photo
- ✓ Ovulation Monitor
- ✓ Tracking and Storing Wellness Data
- ✓ Automated or Manual Monitoring

Notification Messages

Receive instant notifications (phone calls, SMS, Facebook, and more) directly to your smartwatch by turning on individual notifications through the App.

Countdown Timer

Set your desired countdown time through the App and start, pause and reset right from your tūw smartwatch – great for interval training.

Inactivity Reminder

Find yourself sitting for long periods of time? Set the Activity Reminder in the App and tūw will alert you when you have been inactive for too long.

Heart Rate Alert

Set an upper limit measurement in beats per minute through the App and if your heart rate hits that limit your smartwatch will alert you.

Find Phone

Misplaced your cell phone? Simply press the "FindPhone" screen on the smartwatch and if you are connected through Bluetooth, your phone will ring.

Sleep Data Monitor

Get a measurement of your nightly sleep activity including total light sleep, deep sleep and overall quality of sleep.

Alarm Clock

Create a personal wake up call through the App and your smartwatch will vibrate when the alarm time you set is reached.

tūw Smartwatch App

Order your **tūw™** Smartwatch here: www.bydzyne.com/tuw

*The tūw™ Smartwatch is IP67 Splash Resistant (1M). It is splash resistant against freshwater – not water containing chemicals, detergents, chlorine or other contaminants. Avoid harmful contaminants which can erode the smartwatch over time. Not recommended for extended use in water, use in showers, swimming, or other water activities. Avoid charging the device in a wet state. If exposed to water, dry thoroughly before using again. The tūw™ Smartwatch is a general wellness product intended to promote physical fitness by tracking exercise and aerobic activity. The tūw™ Smartwatch is not a medical device and is not intended to be used in the diagnosis, monitoring, prevention, or treatment of disease. Prior to beginning any fitness program please be sure to consult your doctor.
